

Ido Nov

Software Engineer

Location: Berlin based
Phone: +4915757963298
(WhatsApp: [+972547898215](https://wa.me/4915757963298))
Email: idonov8@gmail.com
Website: idonov.com
GitHub: github.com/idonov8
LinkedIn: linkedin.com/in/idonov8

Full-stack engineer with 4+ years of experience shipping production systems across MLOps platforms, spatial data tools, and developer products. Proven ability to own end-to-end delivery as sole engineer or within cross-functional teams.

LANGUAGES

Hebrew - Native
English - Fluent

TECH STACK

FE: React • TypeScript • Next.js • Astro • React Native
BE: Python • Go • PostgreSQL
Infra: Docker • AWS • GCP • Git • CI/CD

Side Projects + Freelance projects

[Berlin-Sessions.com](https://berlin-sessions.com)

Community calendar that aims to include *every jam in Berlin*. User-updated in real time, includes AI features.

[We4Water](https://we4water.com)

Public website showcasing NGOs projects surrounding different water projects. Shows [realtime water quality monitoring](https://we4water.com/realtime-water-quality-monitoring) using an invisible *Grafana* integration I built. Content is edited by the client using *Sanity CMS*.

[DagsHub Academy](https://dagshub.com)

Series of technical tutorial videos explaining how to use the platform effectively.

WORK EXPERIENCE

Freelance Full Stack Engineer / [Magnificode](https://magnificode.com)

Stealth startup building a Lidar point-cloud visualizer for various sensors

2025-2026

- Sole engineer taking the product from zero to shipped MVP. Owned frontend, backend, and infrastructure after the founders' first attempt had failed to deliver a working product
- Restructured *Python* backend to a serverless *AWS Lambda* pipeline processing raw scans into optimized LAZ point clouds up to ~10M points / 1.2+ GB, with concurrent upload/download and progress tracking (S3 file streaming)
- Integrated *Deck.gl* 3D point cloud visualizations, published and maintained NPM packages for the viewer components.

Full-time Full Stack Engineer / [DagsHub](https://dagshub.com)

- Developed features from idea to production, using *Go*, *Python*, *React*, *GCP*, *Kubernetes*, *Docker*, *Jenkins* and more.
- Wrote a [blog](#) that got to the [front page of Hacker News](#) and brought 15k organic visitors in one day.
- Re-built the platforms [GitHub integration](#), recorded a [video](#) too.
- Engineered platform capabilities around *Git*, *DVC*, *Label Studio*, and *MLflow*, building integrations and managed services on top of their APIs and deployment infrastructure for production MLOps workflows
- Collaborated tightly with product and GTM teams to define and implement features around growth, retention and optimizing onboarding.

2021-2024

Frontend Engineer / [HospiTrack](https://hospi-track.com) (Hackathon project)

Won 1st place in a hackathon arranged by Microsoft during COVID.

2020

- Built a mobile app using *React Native* & produced a [video](#).

CS Teacher Assistant, Entrepreneurship Instructor / [MEET](https://meet.me)

- Taught and guided group projects with: *Python*, *Flask*, *Social Lean Canvas*, *Product Management*, *UX* and *Marketing*.
- Supported students through group dynamic challenges in cohorts of 80-100 students.

2018, 2020, 2026

EDUCATION

Full Stack Engineer Course (Mamram) | IDF

IDF's Elite Software Program. 6-month intensive, 4% acceptance rate.

2019

- Learned and practiced computer science, full-stack development, and algorithmic problem-solving.
- Built and deployed web applications using *Vue.js*, *Java*, *Spring Boot*, *Python*, and *C++*.
- Gained deep experience with *Git*, *GitLab*, *Docker*, and modern backend technologies and practiced *Agile* methodologies through team-based and solo projects.

Excellence Peace Program | [MEET](https://meet.me).

- Studied computer science and entrepreneurship skills as *Python Flask* websites & *Lean Canvas* model
- Worked on several startup projects in mixed groups.

2015-2017
