

Ido Nov

Software Engineer

Location: Berlin based
Phone: +4915757963298
(WhatsApp: [+972547898215](https://wa.me/4915757963298))
Email: idonov8@gmail.com
Website: idonov.com
GitHub: github.com/idonov8
LinkedIn: [Ido Nov](#)

I love turning ideas into reality and helping others do the same. Experienced across fast-paced startups and diverse educational settings. I adapt quickly and enjoy shipping products that matter.

LANGUAGES

Hebrew - Native
English - Fluent

TECH STACK

React • TypeScript • Next.js •
Python • Go • PostgreSQL •
Docker • AWS • GCP • Git • CI/CD •
Astro • React Native • OpenAI API

Side Projects + Freelance projects

[Berlin-Sessions.com](#)

Community calendar that aims to include *every jam in Berlin*. Community-updated in real time, includes AI features.

[We4Water](#)

Public website showcasing NGOs projects surrounding different water projects. Shows [realtime water quality monitoring](#) using an invisible *Grafana* integration I built. Content is edited by the client using *Sanity CMS*.

[DagsHub Academy](#)

Series of technical tutorial videos explaining how to use the platform effectively.

WORK EXPERIENCE

[Magnificode](#) / Freelance Full Stack Engineer

2025-
2026

- Sole engineer responsible for frontend and backend development of stealth startup first production product.
- Built the UI of spatial data viewer from scratch using *React* and *Next.js*, deployed on *Vercel*
- Restructured *Python* backend to a serverless *AWS Lambda* architecture, integrated *Deck.gl* 3D pointcloud visualizations, implemented *S3* file streaming and [more](#)

[DagsHub](#) / Full-time Full Stack Engineer

2021-
2024

DagsHub is an MLOps platform based on open source tools, designed to empower ML teams.

- Developed features [from idea to production](#), using *Go*, *Python*, *React*, *GCP*, *Kubernetes*, *Docker*, *Jenkins* and more.
- Wrote a [blog](#) that got to the [front page of Hacker News](#) and brought [15k organic visitors](#) in one day.
- Since DagsHub is based on *git*, *GitHub*, *DVC*, *Label Studio*, *MLflow*, I got very familiar with those tools on a deep level through fixing bugs and implementing features.
- Collaborated with product and GTM teams to define and implement features

[HospiTrack](#) (Hackathon project) / Frontend Engineer

2020

The project was born in a hackathon arranged by Microsoft with the intention to help alleviate coronavirus crisis. We [won 1st place](#).

- Built a working POC mobile app using *React Native*
- Produced a short, clear explainer [video](#) about the product

[MEET](#) / CS Teacher Assistant

2018,
2020

- Taught students as part of a mixed Israeli-Palestinian staff
- Taught Python coding as well as Web Development with Flask framework.
- Helped groups and single students to solve problems in their projects

EDUCATION

Programming Course (Mamram) | [IDF](#)

2019

6-month intensive, highly selective military tech program

- Learned and practiced computer science, full-stack development, and algorithmic problem-solving.
- Built and deployed web applications using *Vue.js*, *Java*, *Spring Boot*, *Python*, and *C++*.
- Gained deep experience with *Git*, *GitLab*, *Docker*, and modern backend technologies and practiced *Agile* methodologies through team-based and solo projects.

Excellence Program | [MEET](#)

2015-
2017

3-year highly selective educational Israeli-Palestinian program, taught entirely in English by MIT instructors.

- I studied computer science and entrepreneurship skills as *Python Flask* websites & *Lean Canvas* model
- Worked on several startup projects in mixed groups.
